# TINPLATE

## Specifications>>>

Product Name	Tinplate(SPTE/ETP)
Standard	GB,JIS,DIN ,ASTM
Material	MR SPCC
Grade	Prime
Annealing	BA/CA
Thickness	0.14-0.6mm
Width	600-1500mm
Temper	T1,T2,T3,T4,T5,DR7,DR8,DR9,TH550,TH580,TH620,TH660
Coating(g/m2)	1.1/1,2.0/2.0,2.8/2.8,2.8/5.6,5.6/5.6,8.4/8.4,11.2/11.2,etc
Surface Finish	Stone,Bright,Silver
Packaging	Standard export packing. or according to customer's requirements.
Payment	T/T or L/C or D/P

## Applications>>>

Tinplate is primarily used for packaging foodstuffs and beverages, but it is also used in containers for oils, grease, paints, polishes, chemicals and many other products. Aerosol containers and caps and closures are also made from ETP.

# TINPLATE PROCESSING SERVICE

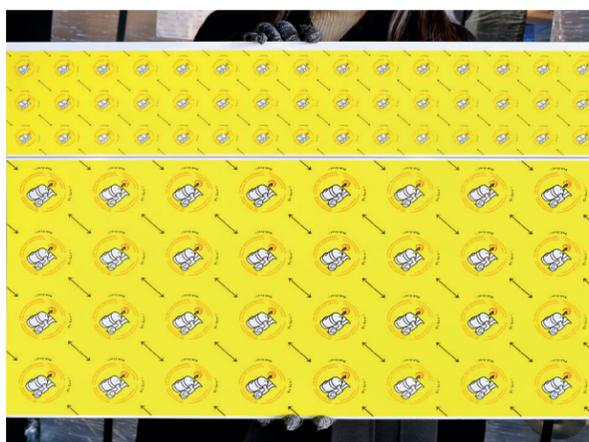

Our goal is to provide customers with efficient, high-quality and environmentally friendly processing services to help them stand out in the fierce market competition.

## Cutting >>

Tinplate Kaiping is a kind of metal processing technology, mainly used in the cutting, straightening and sizing of tinplate materials. Through tinplate kaiping, tinplate materials can be processed to the required specifications and shapes to meet subsequent manufacturing and application needs.

### Coating and printing >>>

We have advanced printing equipment and professional printing technology team, can provide high quality tinplate printing services. The company adopts high quality tinplate material, after surface treatment and printing process, the pattern, text, logo required by customers are printed on the surface of tinplate, in order to achieve good visual effects and publicity effects.
